HE Space is a successful international space company. For 40 years, we have been supporting our customers with qualified experts in the field of engineering, science and administration. HE Space has joined forces with CS Group to lead the engineering and digital space market in Europe and to provide highly skilled consulting.

Image Ground Segment Architect

Key Tasks and Responsibilities

We are recruiting an Image Ground Segment Architect to join our Space business unit in the Images Skills Center. Our Skills Center provides expertise in remote sensing and satellite image processing.

- You will be responsible for developing our activities in the definition, design and development of systems incorporating algorithmic chains based on image processing libraries and tools;
- You will take part in drawing up information system offers for operational projects for new satellite missions.

Skills & Experience

You will have the following qualifications and relevant experience:

- Masters Degree in Engineering;
- You bring least 10 years' experience in the development or operation of image ground segments;
- Mastery of image chain orchestration concepts and ground segment operational issues is essential;
- You will have a good knowledge of Makefile, Python, Script Shell as well as algorithms and image and signal processing;
- You have an experience of the integration of the processors in a cloud environment;
- You are a team player, you like to solve problems while remaining optimistic, and you are familiar with agile development methods;
- Fluency in English is mandatory; knowledge of another European language is an advantage.

This job is located in Harwell, UK.
