

HE Space is a successful international space company. For 40 years, we have been supporting our customers with qualified experts in the field of engineering, science and administration. HE Space has joined forces with CS Group to lead the engineering and digital space market in Europe and to provide highly skilled consulting.

Payload System Engineer

Key Tasks and Responsibilities

As part of the Airbus team, you will have the following responsibilities:

- Define and assess payload system architecture to ensure optimal performance;
- Lead performance analysis from proposal to In-Orbit Testing (IOT);
- Ensure performance accountability across project lifecycles, from proposals through delivery;
- Collaborate with hardware and software teams to optimize payload designs.

Skills & Experience

You will have the following qualifications and relevant experience:

- Master's degree in Engineering;
- Extensive knowledge in payload performance, architecture, and design;
- Experience with performance analysis and verification during proposal and delivery stages;
- Familiarity with in-orbit testing processes;
- Fluency in English is mandatory; knowledge of another European language is an advantage.

This job is located in Portsmouth or Stevenage in UK.
